

Loss Control Services

An Asset to Trucking Professionals

Minimizing risk is essential for businesses in the commercial trucking industry. That's why we provide loss control services to help policyholders protect their vehicles and drivers, enhance their regulatory compliance efforts, and keep their business goals on track. Best of all, **our loss control services are available at no additional cost!**

Regardless of company size, all new policyholders will be contacted by one of our knowledgeable loss control specialists!

On-site and Phone Consultation Services

Lancer's loss control department brings a wealth of technical knowledge and hands-on commercial transportation experience to help insureds reduce their potential for loss, and manage the impact of accidents and the costs associated with them. Our seasoned specialists, who are strategically located throughout the U.S., conduct phone and/or in-person surveys with policyholders at no additional cost to:

- Identify and evaluate exposures
- Review current risk management efforts
- Present actionable loss control recommendations

Regulatory and Compliance Assistance

Our loss control services team also assists policyholders with a vast assortment of DOT and FMCSA regulatory and compliance issues including, but not limited to:

- Drug & Alcohol Clearinghouse requirements
- Electronic Logging Devices (ELDs) rules
- The Pre-Employment Screening (PSP) process
- Compliance, Safety, and Accountability (CSA) / Safety Management System (SMS) data
- Driver Hiring and Retention practices
- When and how to update an MCS-150
- What to do after a motor vehicle accident

Self-Service Loss Control Solutions

As part of our complimentary offerings, we also provide an array of self-service loss prevention solutions to help educate insureds about the dangers on the road and provide insight on regulatory and compliance matters, including:

- **Safety Stop** – Our blog for loss control information, risk management tips, and regulatory updates
- **Natural Disaster Preparedness** – Motor carrier and driver tips to help policyholders prepare for extreme weather conditions and protect vehicles and employees
- **Entry-Level Driver Training (ELDT) Rules** – An invaluable guide that answers questions about the new ELDT regulations
- **Link Up for Safety** – A comprehensive list of industry websites that helps keeping up with all of the topics that affect loss control and federal regulations a little easier
- **SafetyLink Hotline** – A complimentary service to answer policyholder questions or provide additional information on loss prevention, driver training and regulatory issues
- And much more!
